

WHAT IS NZONE GL™?

NZone GL™ is a nitrogen management aid specifically focused for use with anhydrous ammonia and UAN applications.

WHAT ARE THE ADVANTAGES OF NZONE GL™?

- XN™ Technology maintains nitrogen placement without disturbing soil biology
- Versatility with nitrogen sources
- Reduces nitrogen loss due to leaching
- Increases nitrogen availability and uptake
- Treats the unit of nitrogen and not the acre

APPLICATION RATES

ANHYDROUS AMMONIA: 6 oz (177 mL) per 50 units N

LIQUID FERTILIZERS: 1.5 qt (64 oz or 1.5 L) per ton/tonne UAN (28%, 30%, OR 32%)

LIQUID MANURE: 13.5-18 oz (400-530 mL per acre or 988 to 1310 mL per hectare)
